

Name: Sandhya Nadendla
Designation: Software engineer
Mobile: 9493923009
Email: nsandhyadeveloper@gmail.com

EXPERIENCE SUMMARY:

- Solutions focused; quality is driven with 2+ years of experience in development using React js, JavaScript, HTML, and CSS with Bootstrap.
- Experience in analysis, design, and building web applications with React, Node JS
- Experience in building applications with React and Redux.
- Strong knowledge in core javascript, jQuery, Html, CSS, and Bootstrap library
- Experience in building applications with React and Redux.
- Strong knowledge in core javascript, jQuery. Have hands-on experience in debugging issues with their root cause.
- Hands-on ANTD library and AgGrid libraries and Redux.
- Good experience in using Version control systems like git, bitbucket, and in IDE's tool Visual Studio code.
- Have good technical and communication skills.

TECHNICAL SKILLS:

- Front-end Technologies: Core Javascript, HTML, CSS
- Back-end Technologies: Node JS, PHP
- Frameworks/Libraries: React js, jQuery, Redux, Redux-saga, Antd library, AgGrid, Bootstrap
- Database: MSSql, SQL
- Tools: VS code
- Operating system: Windows

PROJECT DETAILS

1. **Content Management Tool:** React 18.x, JavaScript, SQL server, Node JS, AWS

- Understanding the client requirements and providing services to the customers.
- Actively participated in the project design and implementation.
- End-end testing and coordinated with the QA Team in providing the details of functionality.
- Experience in supporting production systems and handling day-to-day issues.
- Implemented blocked-list domain feature in self-service signup in the application to prevent competitors from signing up to the application.
- Created react components for Subscription plans for client business requirements.

2. **Delivery Management Dashboard** - React 18.x, Python-Django, Redux, PostgreSQL

- Involved in design meetings and participated in requirement gathering.
- Participated in discussions with the team on the implementation plan.
- Involved in API Integration, critical bug fixes, and functionalities.
- Designed tables, and forms using Ant Design and organizational charts using Gant charts.
- Implemented UI screens with React JS, Redux, Bootstrap, HTMLS, and CSS.

3. **Roles and Responsibilities:**

- Producing clean, efficient and reusable code in the optimized version.
- Involved in design meetings to understand business requirements.
- Clearly and regularly communicate with clients and technical support colleagues.
- Executing project activities to ensure timely completion.
- Testing and deploying programs and systems.
- Fixing and improving existing software.
- Troubleshoot, debug and upgrade existing software.
- Gather and evaluate user feedback.
- Recommend and execute improvements.
- Create technical documentation for reference and reporting.
